## „Clean Protect Si“

KB Roller Tech invented a new cleaning and refreshment agent for fusing systems with unique properties:

- Free of aromatic hydrocarbons (e.g. toluene)
- Chemical compatibility towards silicone-based rubbers in fusing systems
- Good and fast cleaning of Teflon as well as silicone-rubber surfaces
- Protects the surface of getting dirty after cleaning
- No swelling of the treated surface
- High efficiency out of a little 250 ml service-bottle
